

Conway Consulting Engineers also offers all of our clients the Principal Quality Control (PQC) system. In addition to our peace of mind guarantee that a principal member of the firm works on your project, PQC ensures that technical plans and specifications for all projects pass through an in-house peer review. This system plays a vital role in our ability to guarantee that every project will exceed expectations regarding the constructability of the design, the operation of the system as well as the cost effectiveness of the entire project.

Please let us know if we can be of assistance on your next project.

CONWAY
CONSULTING ENGINEERS

Conway Consulting Engineers is a team-oriented engineering consulting company that provides a peace-of-mind guarantee that a principal of our firm will work on your project. We offer mechanical and electrical engineering services to architects, developers and construction companies. Conway Consulting Engineers upholds the highest level of engineering standards and ethics while providing accurate and reliable consulting services.

The company's founders, Charles D. Conway, P.E. and Wayne D. Owen, P.E., focus on integrating constructability with emerging technologies to enhance the overall effectiveness of every project the company undertakes. Using an open work environment and dual computer monitors for each employee we have developed a team concept that promotes collaboration over isolation.

Our goal-oriented approach to engineering solutions has assisted hundreds of clients in the following industries:

Commercial	Institutional	Data Center
Building Commissioning	Correctional	Healthcare
Mixed-use	Industrial	Retail
Hi-rise Residential	Religious Facilities	Call Center

Our mechanical engineering services are unique in that HVAC, plumbing and fire protection are all handled by one department. This consolidation ensures that a high level of quality control is in place for these services. Our mechanical engineering services include:

HVAC	Plumbing	Fire Protection
Air Distribution	Hot and Cold Water Piping Systems	Sprinkler Systems
HVAC Piping	Drain, Waste and Vent Piping Systems	Standpipe Systems
Energy Management Systems	Storm Water Piping Systems	Fire/Jockey Pumps
Life Cycle Cost Analysis	Natural Gas Piping Systems	Dry Systems
Energy Consumption Studies	Fuel Oil Piping Systems	Clean Agent Fire Suppression
Cost Estimating	Backflow Prevention	
Process Systems	Booster Pump Systems	
Building Automation	Lift Stations	
Refrigeration	Medical Gas Piping	

Our electrical engineering capabilities include:

Electrical	
Electrical Distribution	Fire Alarm Systems
Critical Systems Including Emergency Generators and Uninterruptible Power Systems	Medium Voltage Distribution
Grounding Systems	Lightning Protection
Lighting Control and Dimming Systems	Power Quality Analysis
Building System Analysis	Interior and Exterior Lighting Design
Building & Interior Lighting Design	Site Lighting Design
Short Circuit Analysis	Power System Design
Life Safety Systems	Due Diligence Studies and Reports
